

Force directed graph of colonies
Weighted to Trade gravity
Using country shapes

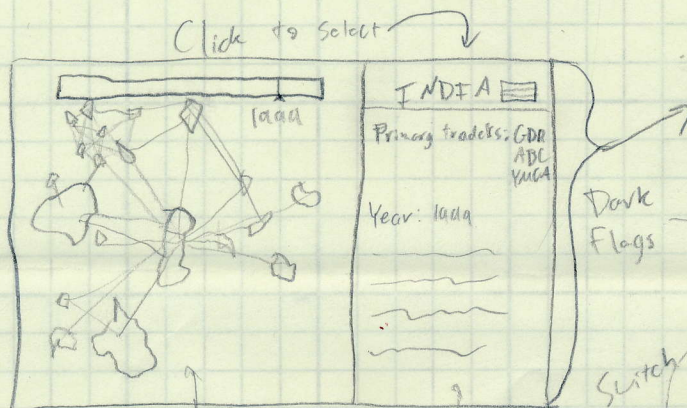

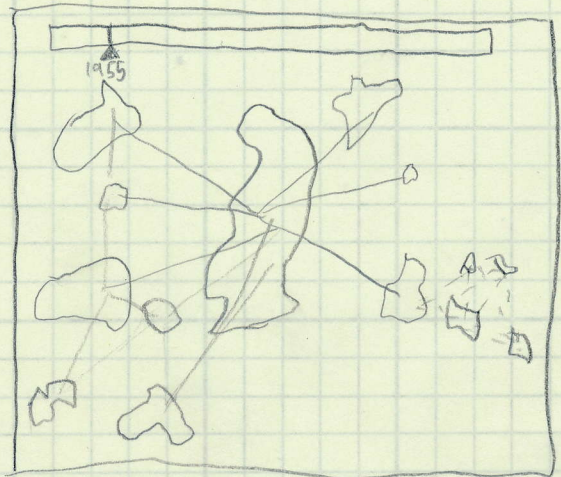

Add info panel
Smaller countries

Color countries by
Colonial status

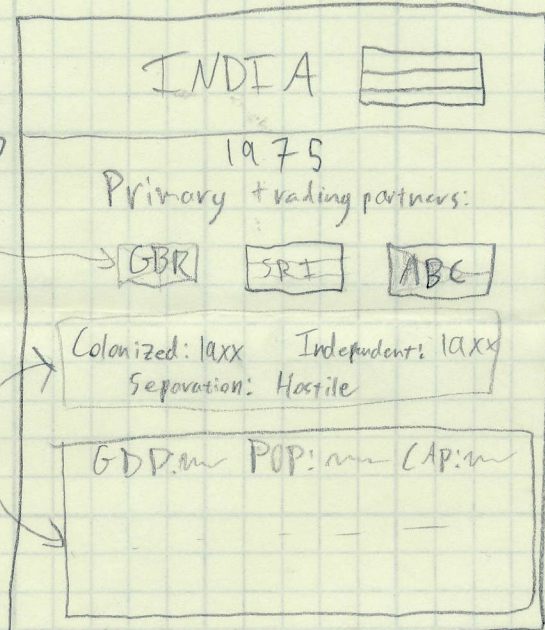

Size by GDP?

How to tell stories?

different styled
lines for active
colonial relationships

More info...

- Pros:
- Love the info panel
 - Shows a global story
 - Big year title on time bar
 - Colonies will move away from GB after indep. and cluster to each other
 - Shows countries with each other

- Cons:
- Cluttered map
 - Non-geographic map
 - Weaker individual stories
 - Impossible to find a specific country
 - Info panel needs colored timeline to give at-a-glance story
